Byram Healthcare's Caring Touch at Home™ Ostomy Program offers you:

Convenience

Ostomy Center of Excellence (COE):
Our Ostomy COE consists of a team of dedicated people that are 100% focused on ostomy care. Their goal is to ensure people with ostomies resume a normal lifestyle. Our ostomy specialists are well trained on the latest ostomy products, stoma management techniques, insurance reimbursement and coverage issues.

Custom Cutting for Ostomy Skin Barriers:
At Byram Healthcare Centers, we provide the unique service of customizing ostomy skin barriers to the proper stomal opening for Byram customers. Byram can provide custom cutting on most types of two-piece ostomy skin barriers.

Multi-Lingual Support:
Our goal is to make it easy for our customers to work with us, eliminating language barriers that can often get in the way of accessing quality care and outstanding service. Byram Customer Service representatives can access our language line at any time and translate up to 250 languages.

Ostomy Clinical Support:
The Byram Healthcare Ostomy Clinical CareLine is designed to support the needs of our current ostomy patients. Closely monitored by our contracted WOCN (Wound, Ostomy, and Continence Nurse), this CareLine is a great resource for anyone experiencing clinical trouble in regard to an ostomy. Our specialized Ostomy CareLine is a resource that can be used for clinical questions or concerns that pop up post discharge or between regular visits to your physician or hospital WOCN. For Ostomy support, please contact our:
Clinical Support CareLine: 1-877-902-9726 ext. 43312

Affordability

Reduce Patient Costs:
Byram can service the majority of Americans with health insurance, including Medicare, most Medicaid and private insurances. Byram Healthcare is a Medicare participating provider. Our reimbursement experts will exhaust all available insurances to lower or eliminate your out of pocket costs. Should you not have insurance that covers ostomy supplies, we understand the financial burden this places on you. Byram is pleased to offer a discount off the cash purchase.

Choice

Extensive Inventory:
Byram has one of the largest inventories of ostomy products in the country. We only carry brand name ostomy products from trusted manufacturers.

Brand Loyal:
We fill the order as prescribed and require patient approval for any product changes.

Medicare Assignment

Byram is a Medicare participating provider. Byram will also bill your secondary insurance for the remaining 20%. You can relax, knowing our reimbursement experts will handle all of the paperwork and obtain prescriptions from your physician.

Private Insurance and Managed Care

Byram will work directly with your insurance company to ensure that you receive your full benefits. Since medical supply coverage and reimbursement varies by health plan, we will be happy to investigate your supply coverage with your insurance company.

Medicaid

Byram participates in many state Medicaid programs. Our customer service representatives will be happy to discuss your particular state's coverage of medical supplies.

Customer Service

Our ostomy specialists are committed to your satisfaction. Our representatives have extensive product and reimbursement knowledge to make ordering easy and convenient. If you do not see the product you are looking for in the catalog, visit our Digital Catalog at byramhealthcare.com for a complete product listing. If you have any questions, contact our customer service department for assistance toll-free at 1-800-308-9445.

Shipping

There is no charge for shipping on insurance covered orders. Most orders will ship the same day by FedEx Ground or through local regional couriers. This provides you with prompt, reliable nationwide delivery. Express shipping options are available.

Privacy Policy

Byram adheres to state and federal laws complying with the confidentiality of business and customer privacy, including the federal HIPAA (Health Insurance Portability and Accountability Act) regulations. If you would like a copy of our Privacy Policy, please visit our website or contact us and we will gladly mail you your policy.

Byram Healthcare's
Home Health Program

How many supplies will my insurance company pay for?

The table below outlines the quantity of supplies that Medicare will reimburse for in a given amount of time. Many health plans also follow Medicare's guidelines. Higher quantities may be available, depending on specific medical reasons documented by your physician. Please contact your Byram Healthcare ostomy specialist at **1-800-308-9445** for questions specific to your insurance.

Item	Unit	Allowable Amount	
		30 Days	**90 Days**
Wafer with Flange	Ea	20	60

AMN=As Medically Necessary.

Byram Healthcare has interpreted Medicare policy in order to create the above reference information and assumes no responsibility for inconsistencies in the policy. All medical and claims determinations will be made by Medicare or your insurance plan.

Byram is a Medicare Participating provider. You are only responsible for any annual deductible, co-payment or items not covered by Medicare, which Byram will bill to your Medicare Supplemental Insurance.

Byram Healthcare's
Ostomy Manufacturer Programs

Before you left the hospital, your ostomy nurse may have enrolled you in a program to receive product samples and ongoing clinical support from one of the following manufacturers.

- Coloplast Care Program
- Convatec me+ Program
- Hollister Secure Start Program

Byram Healthcare participates in all of these programs. Even if you are enrolled in one of these programs, you still have **the right to choose your own supplier like Byram Healthcare** to provide and bill your ostomy supplies to your insurance.

To do so, just tell your ostomy product manufacturer when they call that you would like Byram Healthcare as your provider and they will transfer you directly to one of our ostomy specialists to place your order!

How Manufacturer Support Programs Work

1. Your stoma care nurse enrolls you in a manufacturer support program.
2. The manufacturer ships a sample kit to you within a few days and contacts you about their program.
3. You can specify Byram Healthcare as your medical supplier and they will transfer you directly to an ostomy specialist to place your order.
4. Byram Healthcare will ship supplies directly to your door and bill your insurance.

   Downers Grove, IL 60515

   Please be sure to indicate your method of payment,
   if applicable, and your daytime phone number.

Pouching System Quiz

Closed

T/F: Convenient because they can
be thrown away when it's about half filled

T/F: Good option for colostomies of the lower intestinal
region, where output is thicker

T/F: Can be used along with drainable pouches

Drainable

T/F: Opened at one end, can be emptied, rinsed,
securely closed and reused

T/F: Best used for ileostomies and colostomies of the
higher intestinal regions, which produce a more
frequent, liquid or paste-like output

T/F: Available in different lengths

T/F: May have a built-in or separate tail closure

Urostomy

T/F: Designed for urinary stomas

T/F: Have a valve opening for faster, more convenient
draining of urine and mucus

T/F: Can be attached to a drainage container
at night

One-Piece System

T/F: Skin barrier and pouch are attached to
skin together

T/F: No assembly and fewer steps to apply; generally more
flexible

T/F: One connection point means fewer places for possible
leakage

Pouching System Quiz

Two-Piece Systems

T/F: The barrier is attached to the skin, and the pouch connects to the barrier

T/F: Easier to switch to a different type of pouch

T/F: Easier to clean pouch

T/F: Less skin irritation from changing barriers

T/F: Allows stoma to be visible, making it easier to center the skin barrier

Opaque/Transparent Pouches

T/F: An opaque pouch is more discreet

T/F: Transparent material in a one-piece system can help you center the wafer onto the stoma

Cut-to-Fit/Precut Barriers

T/F: Cut-to-fit barriers allow you to customize the skin barrier opening to fit your stoma

T/F: Pre-cut barriers provide a consistent fit around the stoma

T/F: Pre-cut barriers perform best when used after your stoma has stabilized in shape

Filtered

T/F: Releases gas, but not odor

T/F: Prevents the pouch from ballooning and the need to "burp" the pouch

T/F: Good choice for colostomies with thicker output or when eating gas-causing foods

If you answered True to all of these statements, you are correct!

Getting to Know Your Ostomy

Stoma

Colostomy: Your large intestine has been re-routed so that your body wastes now exit through a stoma on your abdominal wall.

Urostomy: A small segment of your small intestine has been used to re-route urine through a stoma on your abdominal wall.

Ileostomy: Your large intestine has been removed and your small intestine re-routed so that your body wastes now exit through a stoma on your abdominal wall.

All stomas are basically the same, with the exception of size and shape. Your stoma should be red or pink. It is full of blood vessels, which are right on the surface. Your stoma should always be moist, similar to the inside lining of your mouth. It is a mucus membrane that has its own natural lubrication. Your stoma may bleed as it contains many blood vessels. At times when changing the appliance, you may see some blood; do not worry. Your stoma will mend itself, very much the same as when you bite the inside lining of your cheek or mouth. Your stoma has no feeling because it doesn't have nerve endings. The slight movement of the stoma is called peristaltic action. Your stoma will be swollen following surgery and may take from six to eight weeks to shrink. Measure your stoma at each appliance change during this initial period. The appliance must fit properly to protect the skin and to ensure a leak-proof seal.

Lifestyle Tips

Generally, the best time to change your appliance is in the morning before breakfast. Examine the peristomal skin (skin surrounding the stoma). It should be the same color and texture as the rest of the abdominal skin. Avoiding skin irritation is much better than treating it.

You may take a bath or shower with your appliance on or off. Exposure to air, warm water and gentle soap is good for your skin. If you shower with your appliance on and you are using one with tape, the tape portion of the appliance will get wet. As the tape dries (you can blow dry with cool air or pat with a towel), it will remain secure on the skin.

Colostomy

Discharge from your colostomy can vary from a formed stool, pasty-like consistency or just liquid depending on where the stoma was fashioned in the large colon; ascending, transverse, or descending. Some stomas can be controlled through irrigation; some can be managed with a closed-end pouch while others require the use of a drainable-style appliance.

There are no definite diet restrictions for colostomies, however some foods will cause excessive gas such as broccoli, cabbage, eggs, fish, beans. Other foods may be constipating and still others may produce odor while emptying. Experiment with one food at a time so problem foods can be identified easily.

Urostomy

Using a night drainage system will assure a good night sleep! While some prefer to get up periodically throughout the night to empty, it is more convenient to hook up to bedside drainage. The pouch remains empty and you can rest without worry.

There are no specific dietary restrictions for urostomates, but certain food such as asparagus will cause the urine to have more odor. Certain juices such as grapefruit and orange go into your system acidic but exit the body in an alkaline state. Too much alkalinity can cause crystals to build up around the stoma. Cranberry juice is very beneficial in keeping alkaline levels in check.

Ileostomy

Chew all food thoroughly. Popcorn, peanuts, coconut and food with seeds or kernels should be eaten with discretion. Onions, cabbage, spicy foods, fish, garlic and beans may cause an odor when emptying the appliance. Green beans, broccoli, spinach, raw fruits and beer may cause diarrhea. Add one new food at a time so you can identify problems.

Know what medications you are taking; avoid enteric coated pills and time release capsules. These medications are usually not absorbed due to their outer coating. They may exit into the pouch in their original state. Remind your physician that you have an Ileostomy, which may necessitate a different choice of drug. You may discuss this with your pharmacist as well.

Disclaimer: The recommendations and information above should not be considered a substitute for personal medical advice or diagnosis. Before making any changes, consult your health care professional.

Byram is a Medicare Participating provider. You are only responsible for any annual deductible, co-payment or items not covered by Medicare, which Byram will bill to your Medicare Supplemental Insurance.

Custom Cutting Program

What is custom cutting?

Custom cutting is die-cutting the center opening of a wafer to fit the exact shape and size of your stoma.

When is custom cutting recommended?

Custom cutting is most beneficial six to eight weeks after surgery, once your stoma has shrunk and stabilized in size.

Benefits of Byram's Custom Cutting Service

- Provides accurate sizing and proper fit so less time is spent changing the appliance.
- A better fit translates into longer wear time.
- Decrease leakage issues and skin irritation.
- Less skin breakdown translates to fewer physician visits.
- Assists persons with arthritis, vision impairment, or finger/hand dexterity problems.

Call our Ostomy Clinical
Support CareLine:
1-877-902-9726 ext. 43312

Custom Cutting Program

How to measure a stoma?

For oval stomas, the nurse/ostomate must provide the horizontal and vertical measurements.
For this example, the size is ⅞" v x 1¼"h
Round stomas only require one measurement which is the total width of the stoma.

Measure down (vertical)	**Measure across** (horizontal)	

1 ¼"

⅞"

To have your skin barriers custom cut, please visit **mybyramhealthcare.com** or use our app and enter the required information or contact Byram customer service:
1-800-308-9445

Custom Cutting Order Guide*

Items to be cut: _____

Cutting Size

Shape to be cut: Round   Size to be cut: _____

Oval   Size to be cut: _____ x _____

* There is a charge per order for Custom Cutting. Custom cut supplies are not returnable. Please allow an extra day for delivery. One-piece ostomy appliances, pre-cut skin barriers and some two-piece systems cannot be custom cut.

Byram is a Medicare Participating provider. You are only responsible for any annual deductible, co-payment or items not covered by Medicare, which Byram will bill to your Medicare Supplemental Insurance.

Problem Solving:
Colostomy and Illeostomy

Many problems can be solved with simple home remedies or accessory products.

Are you experiencing problems with excess gas?

- Be careful with foods that are gaseous in nature: beans, cabbage, beer, etc.

- If possible, select a pouch with a filter (most closed-end and some drainable models incorporate a filter) or add a filter to your current appliance.

- Never puncture the material on the pouch, this destroys the odor-proof film and allows odor to seep out at will. You can also add a gas vent tab to the top of your bag to release air.

Are you experiencing problems with odor?

- Everyone using the bathroom creates an odor. However, stool or fecal material that is contained in an appliance for several hours builds up bacteria and may be more offensive when emptying.

- There are many good appliance deodorants on the market that can help neutralize odors within the pouch.

- Certain foods may cause more odor. You may want to avoid these if you'll be using a bathroom away from home.

- Please refer to the section in this book labeled "Food Which May Influence Stoma Function."

- To order or inquire about appliance deodorant, refer to the Accessory Section in this catalog and then please call a **Byram Representative at 1-800-308-9445.**

Do you have difficulty in emptying or disposing of your pouch?

- Always place some bathroom tissue in toilet prior to emptying pouch contents. This will eliminate back splash.

- Make certain the end of the tail spout is facing upward (rather than under), this will allow easier emptying and directing into the toilet.

- Clean tail spout inside and out with tissue prior to applying the clip or securing the "Velcro-like" closure.

Do you have difficulty with stool or fecal material not dropping down in pouch?

- Leave a small amount of air in pouch when emptying; do not flatten pouch.

- Before applying the clip or securing "Velcro-like" closure, pull walls of pouch apart to trap a small bubble of air. This will prevent clothing from pressing down on the appliance.

- A lubricating deodorant can ease pouch emptying and help prevent pouch static and sticking. For more information refer to the Accessory Section in this catalog and then contact a Byram Representative at **1-800-308-9445**

- You may also want to talk to your doctor about using a stool softener to help thin out your stool. This may help stool fall into the bag more easily.

Are you experiencing problems with liquid drainage?

- Use a jelling agent to solidify drainage - contents will slide out easily. This will decrease noise and allow the contents to slide out more easily.

- Single use packets make gelling agents easy to use with each pouch change. You may want to wear an ostomy belt to help hold the wafer on more securely.

- Remember to place toilet paper into the toilet first to decrease splashing.

Problem Solving:
Urostomy

Do you have problems with mucous clogging the valves?

- Mucous cannot be avoided since the urostomy is fashioned from the small intestine. Call Byram customer service for assistance at **1-800-308-9445**.

Are you experiencing problems with your night drainage tube?

- Always keep a small amount of urine in your pouch prior to connecting to night drainage. This will give an immediate flow of urine down the tube and break any air pockets.

- Be sure that the tubing is straight down the bed, or with a curl if placed on the side of the bed. Using a leg strap will prevent twisting and kinking of tube.

How can you wash pouches and night bag?

- There are a variety of appliance cleaners available for urinary systems. For ordering information, call Byram at **1-800-308-9445.**

- In a pinch, white vinegar and water can also be used to rinse out urinary pouches, and a baking soda and water solution is effective in night bags.

Does your tubing become discolored?

- Most night drainage bottles or bags are disposable in nature because they are very difficult to clean with long usage.

- To discuss available urinary appliance cleaners and decrystalizers call Byram custom service today for assistance at **1-800-308-9445.**

Disclaimer: The recommendations and information above should not be considered a substitute for personal medical advice or diagnosis. Before making any changes, consult your health care professional.

Food:
Which may influence stoma function

Foods Which May Thicken Stool
May decrease stomal output and help in managing diarrhea.

Applesauce	Chocolate	Tapioca	Bananas	Peanut Butter
Milk	Boiled Potatoes	Cheese	Rice	Whole Wheat Bread

Foods Which May Increase Stomal Output
May cause an increase in peristalsis and may also be used as a means to relieve constipation.

Alcohol	Cucumbers	Iced beverages	Rhubarb	Beans
Figs	Milk, fresh	Spicy foods	Broccoli	Fried foods
Onions	Vegetables, leaf	Cabbage	Fruit, raw	Prunes
Coffee	Fruit juice	Plums		

Foods Which May Discolor Fecal Output
If you notice a discoloration of the stool, think back to what you have eaten to note if food may be the cause. Call your doctor when stool discoloration is not food related.

Beets	Licorice	Tomato Juice	Food Dye
Red Jello	Vitamins w/iron	Iron Pill	Spinach
Watermelon	Kool-Aid	Strawberries	

Foods Which May Produce Gas

Apple Juice	Cheese, Strong	Peas	Asparagus
Chewing Gum	Radishes	Beans	Cucumbers
Spices	Beer	Eggs	Spinach
Broccoli	Fish	Sprouts	Brussel Sprouts
Fruit Juice	Sweet Potato	Cabbage Family	Melon
Vegetable	Mushroom	Juice	Cauliflower
Nuts	Yeast	Onions	Carbonated Beverages

Foods Which May Inhibit Gas

Apple Juice	Cranberry Juice	Buttermilk	Yogurt

Foods Which May Produce Odor

Illeostomy		Urostomy	Colostomy
Alcohol	Fish	Asparagus	Asparagus
Beverages	Garlic	Fish	Baked Beans
Asparagus	Mushrooms	Onions	Broccoli
Baked Beans	Nuts		Fish
Cabbage	Pears		Onions
Cheese	Vitamins		Pears
Eggs			

Foods Which May Inhibit Odor

Buttermilk	Parsley	Tomato Juice	Cranberry Juice
Spinach	Yogurts	Lettuce

United Ostomy Associations of America, Inc.

YOU MATTER!

Know what to Expect and Know your Rights
Ostomy and Continent Diversion Patient Bill of Rights:

SIDE ONE

THE OSTOMY AND CONTINENT DIVERSION PATIENT BILL OF RIGHTS (PBOR)

The **PBOR** is a tool produced by United Ostomy Associations of America for patients to advocate for their care and outlines evidence based, best in practice guidelines for health care professionals. A person needing ostomy or continent diversion surgery must have access to high-quality care in all health care settings and should receive appropriate education and support by a health care professional certified in ostomy care to promote optimal adaptation to surgery and achieve a desirable quality of life.

© 2017 UOAA. All Rights Reserved.

SIDE TWO

Those needing ostomy/continent diversion surgery shall be involved in all phases of the surgical experience except in preoperative emergent situations and shall receive:

During the preoperative phase:
· Stoma site marking
· Discussion of care and impact on activities of daily living
· Emotional support

During the operative phase:
· A stoma that is well-positioned and can be fit with a reliable pouching system

During the postoperative phase:
· Instruction and educational materials on self-care of specific ostomy (i.e., emptying/changing pouch, care of skin, troubleshooting, dietary/fluid guidelines)

· Resources for obtaining supplies and support

During the lifespan:
· Health care professionals with knowledge specific to the care of ostomy/continent diversion in all health care settings including telemedicine
· Reevaluation of ostomy management and supplies following changes in medical condition, and aging
· Specific ostomy supplies to maintain a reliable fitting pouching system

FOLD LINE

For more details about these rights visit **www.ostomy.org**

If you believe your rights are not being met, speak up and ask to be heard.

BE A FORCE FOR CHANGE!

TRAVEL TIPS

Travel plans do not need any special attention other than careful preparation. However you travel, be sure to anticipate your needs.

Here are some travel tips to keep your journey relaxing.

Create a detailed list of all the supplies you use; catalog numbers, sizes, description, cut size (a copy of your last Byram invoice will do the trick). Pack extra supplies but do not overload.

While traveling, should an emergency arise, simply call us at **1-800-308-9445** for assistance. You can also look in the yellow pages under "Surgical Supplies." Do not panic if you cannot find the model of appliance you are currently using; many brands are similar and can get you through this time.

Always pack your supplies in a separate suitcase or carry-on and never allow this bag to leave your side. When traveling by car, avoid leaving supplies in your trunk, as excessive heat may cause wafers or other items to melt.

Appliance wear-time may shorten in hot climates, so be prepared to change more frequently if needed.

When traveling on planes, remember the restrictions on liquids for carry-on luggage. Put liquid deodorants or adhesives in your checked baggage or put some into less than 3 oz. travel containers.

If you are going to be swimming, you may need to change your wafer more frequently. You may secure your wafer by using skin barrier strips. Refer to the Accessory Section in this catalog for more information.

The Transportation Security Administration offers a helpline to assist travelers with disabilities and medical conditions. **TSA Cares can be reached toll free at 1-855-787-2227** prior to traveling with questions about screening and what to expect at the security checkpoint.

The most common complaint of all travelers is a change in bowel habits due to different foods, unfamiliar water, schedule and time changes. Ask your physician for a prescription for diarrhea before leaving home.

Drink only bottled water if possible and try new foods one day at a time.

Travel Communication Card

Compliments of the United Ostomy Associations of America, Inc.

This is provided to travelers in order to simplify communication with federal Transportation Security personnel and airline flight attendants, at those times when you wish or need to communicate in a non-verbal way, as is your legal right. This is not a "certificate" and it is not a "pass" to help you avoid screening.

Please trim to wallet-size and laminate if desired. The blue color is important, as it is a "flash-card" developed by the TSA so their own officers will recognize it and be guided to treat the traveler with discretion and sensitivity.

If laminated in a double-side manner, it can be used 'blue side out' during security screening, and the white side out when communicating non-verbally with airline personnel.

News

- You may always have a travel companion with you during a private screening
- TSA officers should NOT ask you to show your pouch—you may be asked to rub over your pouch outside your clothing so they can test your hand to rule out explosive residue.
- To file a complaint, send an email to **TSA.ODPO@dhs.gov** (with a copy to advocacy@uoaa.org, please)

Cut, fold and place with your travel documents

TSA Notification Card: Individuals with Disabilities and Medical Conditions

I have the following health condition, disability or medical device that may affect my screening:

I understand that alternate procedures providing an equivalent level of security screening are available and can be done in private. I also understand that presenting this card does not exempt me from screening.

Information • Assistance Requests • Compliments • Complaints

TSA Cares

1-855-787-2227 (Federal Relay 711)
Weekdays: 8 a.m. to 11 p.m. ET

TSA-ContactCenter@tsa.dhs.gov
Weekends/Holidays: 9 a.m. to 8 p.m. ET

Hablamos Español
Automated information offered in 12 languages

Call 72 hours prior to traveling to request the assistance of a Passenger Support Specialist (PSS) at the checkpoint. If a PSS is not available, you may ask for a Supervisory TSA Officer at the checkpoint.

RESTROOM ACCESS NEEDED NOW

The cardholder needs urgent restroom access to empty or change their ostomy pouch and/or catheter.

RESTROOM COMMUNICATION CARD

The cardholder is wearing an ostomy pouch which contains bodily waste and is carrying pouches and related supplies to manage personal hygiene.
Access to the restroom is critical for the cardholder's wellbeing and for public sanitation.
Thank you for your help and understanding.

New Image™ Flextend™ Barriers

This skin barrier is part of a two-piece pouching system. The Flextend barrier is an extended wear skin barrier that is durable and offers high resistance to erosion. The skin barrier has an integrated floating flange, which allows fingers to be placed under the flange, to help minimize pressure on the abdomen when attaching a pouch.

New Image™ Two-Piece High Output Urostomy Pouch

A two-piece, drainable pouching system with an integrated soft tap at the bottom of the pouch, which allows it to be connected to a Hollister High Output collection bag without the use of an adapter. These pouches are most suitable for colostomies or ileostomies with high volume and/or liquid output. New Image™ pouches have an integrated coupling system; the audible clicks indicate the system is locked in position. The pouch can be connected to all New Image™ skin barriers. The AF300™ filter allows for slow release and deodorization of gas from the pouch. Soft, beige ComfortWear™ pouch panels help provide comfort and discretion.

Premier™ CeraPlus™ One-Piece Drainable Pouch

CeraPlus™ One-Piece Pouches protect skin from Day 1 to enhance security and skin health. CeraPlus™ One-Piece Pouches provide a secure, comfortable fit to protect from leakage and are infused with ceramide. Healthy skin has abundant levels of ceramide which helps prevent water loss that can lead to skin damage and dryness. The integrated Lock 'n Roll™ microseal closure which utilizes plastic interlocking fasteners to create a secure closure at the bottom of the pouch. The AF300™ filter allows for a slow release and deodorization of gas from the pouch.

Premier™ SoftFlex™ One-Piece Closed Pouch

A one-piece, closed pouching system designed to be removed after use. These pouches are most suitable for colostomies or for stomas with less frequent or more predictable output. The SoftFlex barrier is a standard wear skin barrier that is gentle to the skin and allows for frequent pouch removal. The AF300 filter allows for a slow release and deodorization of gas from the pouch. Soft, beige ComfortWear pouch panels help provide comfort.

Premier™ CeraPlus™ One-Piece Urostomy Pouch

A one-piece urostomy pouching system featuring the CeraPlus™ skin barrier with Remois technology* that is infused with ceramide. Ceramide is a natural component of human skin that helps to decrease transepidermal water loss (TEWL) from damaged or eroded skin. It is designed to maintain adhesive properties and features a formulation designed to help protect the skin's natural moisture barrier and maintain good peristomal skin health.

Premier™ Flextend™ One-Piece Urostomy Pouch

A one-piece, urostomy pouching system with a tap at the bottom, which allows it to be connected to a bedside collector with the use of the adapter provided. The Flextend barrier is an extended wear skin barrier that is durable and offers high resistance to erosion. Anti-reflux feature in pouch minimizes backflow of urine. Soft, beige ComfortWear pouch panels help provide comfort.

One-piece High Output Ostomy Pouch with Soft Convex Skin Barrier

A one-piece, drainable pouching system with an integrated soft tap the bottom of the pouch, which allows it to be connected to a Hollister High Output collection bag without the use of an adapter. These pouches are most suitable for colostomies or ileostomies with high volume and/or liquid output. The skin barrier has a strong ability to withstand erosion.

Cut-to-fit | Transparent

H05551	A4413	Corrugated tube with inner diameter of minimum - .47 inches	

Pouchkins™ SoftFlex™ Pediatric One-Piece Pouch

A one-piece, drainable pouching system designed to be opened at the bottom when emptying. These pouches are most suitable for colostomies or ileostomies. The SoftFlex barrier is a standard wear skin barrier that is gentle to the skin. The Lock 'n Roll microseal closure utilizes plastic interlocking fasteners to create a secure closure at the bottom of the pouch. The AF300 filter allows for a slow release and deodorization of gas from the pouch (item 3795 only). Soft, beige ComfortWear pouch panels on body side.

Box of 10 | Cut-to-Fit | Transparent | Standard Wear

H03796	A5061	Flat	0 - 1 1/2"	6 1/2"	No	1-Sided

Pouchkins™ SoftFlex™ Newborn Pouch with Barrier

This pouching system is designed for small infants. The skin barrier and pouch are separate and need to be assembled to be used as a one-piece pouching system. The SoftFlex barrier is a standard wear skin barrier that is gentle to the skin. The pouch has a drain tap at the bottom, which is compatible with a Luer-Lock syringe, which makes emptying easier when drainage is liquid. The bottom of the pouch may be cut off and a soft wire closure can be added at the bottom.

Box of 15 | Cut-to-Fit | Transparent | Standard Wear

BHC Item #	HCPCS	Barrier Type	Cut-to-Fit	Pouch Length	Filter
H03778	A5052	Flat	0 x 0 - 1 3/8" x 7/8"	6 1/2"	No

Pouchkins™ SoftFlex™ Premie Pouch with Barrier

This pouching system is intended for low birth-weight infants. The skin barrier and pouch are separate and need to be assembled to be used as a one-piece pouching system. The SoftFlex barrier is a standard wear skin barrier that is gentle to the skin. The pouch may be removed for emptying or the bottom of the pouch may be cut off and a soft wire closure (included) can be added at the bottom.

Box of 15 | Cut-to-Fit | Transparent | Standard Wear

H03777	A5052	Flat	0 - 5/8"	4 1/2"	No

Pouchkins™ SoftFlex™ Pediatric One-Piece Urostomy Pouch

A one-piece, urostomy pouching system with a tap at the bottom, which allows it to be connected to a bedside collector with the use of the adapter provided. The SoftFlex barrier is a standard wear skin barrier that is gentle to the skin. Anti-reflux feature in pouch minimizes backflow of urine. Soft, beige ComfortWear pouch panels on body side.

Box of 10 | Cut-to-Fit | Transparent | Standard Wear

BHC Item #	HCPCS	Barrier Type	Cut-to-Fit	Pouch Length	Comfort Panel
H03797	A5071	Flat	0 - 1 1/2"	8 3/4"	1-Sided

Pouchkins™ SoftFlex™ Pediatric Barrier

This skin barrier is part of a two-piece pouching system. The SoftFlex barrier is a standard wear skin barrier, which has a gentle adhesive and allows for frequent pouch changes. The skin barrier has an integrated floating flange, which allows fingers to be placed under the flange, to help minimize pressure on the abdomen when attaching a pouch.

Box of 5 | Cut-to-Fit | Standard Wear

New Image™ Irrigation Sleeves

This product is part of a two-piece pouching system. The irrigation sleeve is designed to be used when routine colostomy irrigation is recommended by a healthcare professional to regulate emptying the bowel at a scheduled time. The irrigation sleeve opens at the top for easy access to the stoma during the irrigation procedure and can be closed with the attached wire closure. The long sleeve allows effluent to be directed into the toilet. Integrated tabs permit easy attachment of a belt. Includes drainable pouch clamp.

SQ421041	A4409	Flat	1 1/4" - 1 3/4"	Yes	●

Natura Cut-to-Fit Accordion Flange

Take the pressure off pouch application. The Natura™ Cut-to-Fit Accordion Flange is designed to make pouch application easier and more comfortable. Key benefits include: Comfort – flange lifts easily providing generous finger room for pouch attachment with minimal pressure. Designed for tender abdomens or for everyday comfort. Discretion – once applied, low profile flange is flexible and conforms to body contours. Available with Stomahesive™ and Durahesive™ adhesive options. Pair the Accordion Flange with our state-of-the-art Natura™+ comfort pouches available in a choice of closed, drainable and urostomy options. 2X more finger space than any other lifting flange.

SUR-FIT Natura Two-Piece Stomahesive Skin Barrier

The SUR-FIT Natura® ostomy system is a comprehensive product line with our latest skin barrier technologies. The plastic coupling ring allows the pouch and skin barrier to snap together for audible security. Stomahesive® skin barriers are ideal for people whose stoma output is semi-formed to formed. This reliable skin barrier provides a unique formula that enables the skin barrier to adhere to both dry and moist skin. It is gentle on skin yet holds firmly.

SUR-FIT Natura Two-Piece Durahesive Skin Barrier with CONVEX-IT Technology

The SUR-FIT Natura® Two-Piece Ostomy System is Convatec's most extensive two-piece product line. The SUR-FIT Natura® Flange System signals a secure, accurate closure with a series of audible "clicks". A simple snap-off, snap on design allows users to change the pouch quickly to match activities without removing the skin barrier from the skin. Durahesive® skin barriers are designed for people whose stoma output is mostly liquid. Unlike other skin barriers that can break down around liquid output, Durahesive® skin barriers swell up to protect the stoma. This special effect, called turtlenecking, helps create a more secure seal without harming the skin. Durahesive® skin barriers are also easy to fit, apply, and remove. They will adhere securely to the skin while showering, bathing, and swimming.

SUR-FIT Natura Moldable Technology Skin Barrier

The SUR-FIT Natura® Two-Piece Ostomy System is Convatec's most extensive two-piece product line. The SUR-FIT Natura® Flange System signals a secure, accurate closure with a series of audible "clicks". A simple snap-off, snap on design allows users to change the pouch quickly to match activities without removing the skin barrier from the skin. Durahesive® skin barriers are designed for people whose stoma output is mostly liquid. Unlike other skin barriers that can break down around liquid output, Durahesive® skin barriers swell up to protect the stoma. This special effect, called turtlenecking, helps create a more secure seal without harming the skin. Convatec Moldable Technology™ skin barriers provided a personalized, custom fit around the stoma to help protect the peristomal skin. They require no cutting or guess work making them very easy to use. Available in flat and convex skin barrier. Convex is good for people with a retracted or flush stoma.

Esteem Synergy Flat Moldable Skin Barriers

The Esteem synergy Ostomy System offers skin barriers with our latest skin barrier technology. Convatec Moldable Technology™ skin barriers provided a personalized, custom fit around the stoma to help protect the peristomal skin. They require no cutting or guess work making them very easy to use. The Esteem synergy Ostomy System utilizes an innovative Adhesive Coupling Technology™ that connects the pouch to the skin barrier and eliminates the need for plastic rings that must be snapped or locked together. Instead of a plastic ring, Esteem synergy Pouches feature a flat, flexible adhesive foam ring that securely connects to a flexible, clear "landing zone" on the skin barrier. The result is a low-profile, flexible two-piece system.

Box of 10 | Moldable | Standard Wear

BHC Item #	HCPCS	Barrier Type	Moldable Range	Color Code

SQ411659	A4414	Flat	1 1/4" - 1 3/4"	🟡

Esteem Synergy Adhesive Coupling Technology Convex Moldable Durahesive Skin Barrier

The Esteem synergy ostomy system features an innovative Adhesive Coupling Technology™. Instead of plastic rings, a patented foam adhesive allows the pouch to be securely attached to the skin barrier on a clear plastic "Landing Zone" flange. The result is a low profile, flexible, two-piece system. Convex is good for people with a recessed or flat stoma. Moldable allows for improved skin protection over traditional barriers.

Box of 10 | Moldable | Extended Wear

Esteem Synergy Stomahesive Skin Barrier

The Esteem Synergy+ system features an innovative Adhesive Coupling Technology™. Instead of plastic rings, a foam adhesive securely couples the pouch to the skin barrier's clear plastic "Landing Zone." The result is a low profile, flexible, secure system, with the convenience of a one piece and the versatility of a two-piece.

Byram HEALTHCARE

Esteem+ One-Piece Drainable Pouch

The one-piece system that's gentle on the skin, while remaining secure and easy to use! Flexible and discreet, the Esteem+ one-piece system is the all-in-one solution that combines the baseplate and pouch in a single unit, allowing for a simple, secure, and comfortable experience. Available with a modified Stomahesive® that gently adheres to skin and protects it from break down.

NuHope Nu-Form Support Belts

The Nu-Form Ostomy and Hernia Support Belt by Nu-Hope is designed to support larger hernias that do not reduce or to support multiple hernias. The Nu-Form Belt forms around bulges while offering support to the hernia and holding the pouch in place on the body. Belts are available in sizes small through XXL and widths from 3" to 9". Each belt has an opening to accommodate an ostomy appliance. The opening size is dependent upon the ostomy appliace manufacturer and product number. There are 21 opening sizes available to choose from. Belts are available in Cool Comfort or Regular Elastic, in white or beige color. To find your size, measure around the body in line with the stoma after lying down for 5 minutes as well as standing. To find the width, measure from the bottom of the hernia to the top of the hernia. The belt width needs to cover 75-80% of the hernia (if you measure 6", then you will choose a 4 or 5" width belt). Customizations are available.

Each of 1 | 3" Wide | 2 3/8" Center Opening

NuHope Flat Panel Support Belts

The Flat Panel Ostomy and Hernia Support Belt by Nu-Hope is designed to support the abdomen, reducible hernias and ostomy pouches. The Flat Panel Belt flattens minor bulges while offering support to the area around the ostomy and holding the pouch in place on the body. The Flat Panel Belt has a firm, non-stretch panel for support. Belts are available in sizes small through XXL and widths from 3" to 9". Each belt has an opening to accommodate an ostomy appliance. The opening size is dependent upon the ostomy appliance manufacturer and product number. There are 21 opening sizes available to choose from. Belts are available in Cool Comfort or Regular Elastic, in white or beige color. To find your size, measure around the body in line with the stoma after lying down for 5 minutes as well as standing. To find the width, measure from the bottom of the hernia to the top of the hernia. The belt width needs to cover 75-80% of the hernia (if you measure 6", then you will choose a 4 or 5" width belt). Adapt™ CeraRing™ Convex Barrier Rings

Infused with ceramide – a natural component of the skin – Adapt CeraRing is designed to support healthy peristomal skin. The convex shape helps provide uniform pressure around the stoma to help prevent leakage and provide an optimal fit. Adapt CeraRing convex barrier ring can be used individually, or stacked together to create a customized level of convexity.

SKIN BARRIER RINGS

Adapt™ Flextend M™ Convex Barrier Rings

Adapt Convex Barrier Rings can be used to help prevent ostomy output from getting under the pouch seal. They may be cut or stacked together to help improve the fit of a pouching system and are available in round and oval shapes to accommodate a variety of stomas. Adapt convex barrier rings can be used to create round or oval convexity, deep convexity when applied to a convex barrier or flexible convexity when applied to a flat barrier.

Adapt™ Flextend M™ Barrier Strips

Adapt™ Flextend M™ Barrier StripsAdapt skin barrier strips can be used to fill in or caulk uneven skin contours near the stoma to create a flatter surface and help prevent ostomy drainage from getting under the ostomy barrier. They may be cut to help improve the fit of a pouching system.

BHC Item #	HCPCS	Size	Quantity
H079400	A4385	60g	Box of 10

Safe N Simple Secure - Conforming Skin Barrier Ring

The conforming seals are ideal for any type of ostomy. It will create a secure seal at the base of the stoma and is highly absorbent. These rings "Hold up Better", promoting longer pouch wear time and do not leave a mess when removed from the skin. They are very moldable and stretchable with a strong tack and require no cutting. Great for replacing paste

BHC Item #	HCPCS	Size	Quantity
SNS684U2	A4385	2"	Box of 10
SNS684U4	A4385	4"	Box of 10

Safe N Simple Secure - Integrity Skin Barrier Ring

These durable skin barrier rings maintain their integrity and do not melt down from excessive moisture or body heat. Integrity skin barrier rings are ideal for those with a Colostomy that do not need absorption protective seal to prevent leakage. Sticky, thin, low profile seals stretch and mold easily to fit around stoma.

BHC Item #	HCPCS	Size	Quantity
SNS68002	A4385	2"	Box of 20

SKIN BARRIER RINGS

Safe N Simple Secure - Longevity Skin Barrier Ring

This seal has two unique sides of two different hydrocolloid formulations - the skin side is white and contains zinc oxide - it has low absorbency but offers great tack and maintains its integrity while the wafer side has great tack and high absorbency and will swell and turtleneck while providing a great seal to the wafer

BHC Item #	HCPCS	Size	Quantity
SNS684H2	A4385	2"	Box of 10

TRIO Genii™ Flat

TRIO Genii™ Flat is the only silicone based ostomy seal available anywhere and offers a superior solution for preventing leakage and protecting the skin around the base of your stoma

ESENTA™ Strips

Thin flexible strips that overlap the skin barrier. Features include: Secure - Helps keep your skin barrier in place, Skin friendly, Water Resistant - Designed to be used for both swimming and bathing, Flexible and thin - Designed to move with you, Easy application - Curved to be used with any ostomy system.

Box of 80

BHC Item #	HCPCS	Size
SQ423826	A4362	3cm x 9cm

CeraPlus™ Barrier Extenders

CeraPlus™ barrier extenders easily frame the skin barrier, and the thin, flexible hydrocolloid formulation helps conform to uneven body folds and contours. CeraPlus barrier extenders are infused with ceramide to help protect the skin from damage and dryness. This may help increase wear time, by reducing barrier edge lifting and increasing the adhesive coverage area. These may be beneficial for users who require an additional layer of security, do not use an integrated tape bordered product, or need extra adhesion to accommodate a parastomal hernia or abdominal creases.

Box of 30

BHC Item #	HCPCS
H079402	A4362

Ostoform™ Crest

Designed to deliver an ideal fit for challenging stomas. Perfect for addressing dips or irregular shaped stomas. It can be used as two rings to support figure-eight stomas and acts as a packing agent with FLOWASSIST products and similar systems. It can also be applied as an extension for the FLOWASSIST Seal to create an extra-large seal (up to 55mm).

SKIN BARRIER STRIPS AND EXTENDERS

Safe N Simple Secure - Skin Barrier Arcs

The skin barrier arcs can be placed directly on the irritated skin around the stoma to create a smooth platform to adhere that pouch or wafer. The arcs protect the skin from trauma caused by repetitive removal of tapes and adhesives. The skin barrier arcs can be placed around the wafer to secure the edges from lifting up, creasing or loosening. Use 1 to 3 arcs around the edges. Skin Barrier arcs provide an excellent alternative to waterproof tapes and give you a waterproof seal around the wafer when bathing, showering or swimming

Box of 20
