

LET'S TALK ABOUT LEAKS!

Learn more about incontinence and how you can help your customers!

Brought to you by ✨Prevail eCare

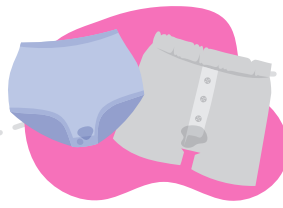

Have you or a loved one have been...

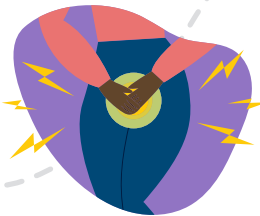

Rushing to go to the bathroom and don't make it there on time

Leaking urine when they cough, sneeze, laugh, exercise, or pick up heavy things

Needing to use the bathroom often and finding wetness in their underwear

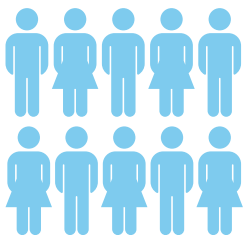

Feeling as if they're still full after urinating and leaking a little urine afterwards

Wetting the bed or their clothing

THESE ARE SIGNS OF INCONTINENCE!

You can help by letting them know it's common and that they're not alone.

Millions of people experience incontinence everyday!

33 Million

DON'T BE AFRAID TO TALK ABOUT IT

People with leaks often feel embarrassed and uncomfortable discussing such a private matter with their healthcare provider.

WE GET THAT.

Remind them their healthcare provider has heard it all before and can be a trustworthy and supportive partner.

Incontinence isn't the same for everyone! There are several different types:

STRESS

URGE

MIXED

OVERFLOW

FUNCTIONAL

Finding the right product can be confusing for someone experiencing incontinence for the first time. Try walking through this guide with them:

| DAY/NIGHT: Choose the flow that best describes your urinary incontinence | MOBILE  | NON MOBILE  | RECOMMENDED PRODUCT FOR YOU: | |
|---|---|---|---|---|
| LIGHT FLOW A few drops?  | ✓ | |  | BLADDER CONTROL PADS & MALE GUARDS Prevail has light absorbency product options designed specifically for women and men. Bladder Control Pads are intended for women, which are available in a variety of absorbencies. Male Guards are intended for the male anatomy. These products are designed for bladder leaks and those who are active and mobile. |
| MODERATE FLOW More than a few drops?  | ✓ | |  | ADULT PROTECTIVE UNDERWEAR OR PANT LINERS Prevail's Protective Underwear is available in both unisex and gender specific options providing dignity and to help promote independence. These products are designed for heavy leaks, streams and surges for those who are mobile and able to transfer or walk to the toilet. Protective Underwear would not be appropriate for fecal incontinence. |
| | | ✓ |  | Briefs are appropriate for those who are immobile. |
| HEAVY FLOW Steady flow?  | ✓ | ✓ |  | ABSORBENT BRIEFS Prevail Adult Briefs are designed to provide superior protection for heavy bladder leaks and/or fecal incontinence. Adult Briefs are ideal for those who are not active, immobile or require additional night time protection. |
